MORE VALUE IN THE FIELD

KAWECO – MORE THAN 60 YEARS OF EXPERIENCE

FOCUS ON ADDED VALUE

KAWECO B.V. is a renowned manufacturer of agricultural machinery and has been synonymous with robust, reliable and innovative products in slurry technology for decades. KAWECO has been developing and manufacturing its own machines since the 1960s, including irrigation technology, silage trailers and slurry tanks.

KAWECO was born out of a passion for agricultural machinery. We share this passion with our customers. We care about the soil and the entrepreneur. Reliable, fast and efficient, so that the right measures can be taken at the ideal time. According to our philosophy, every machine must above all be beneficial to the soil. As a result, a KAWECO machine offers added value for the soil, the plants and the entrepreneur of today and for future generations.

In order to meet the needs of our customers and to be able to produce efficiently, KAWECO machines are modular in design. All machines (both standard and custom-made) are manufactured exclusively on request in a well-equipped production facility using modern techniques and experienced specialists. Sheet metal work, welding and painting are all carried out on site in the Netherlands. This enables us to guarantee the quality of our products. KAWECO machines are designed for quality. This means that only quality components are used in production.

At the beginning of 2025, KAWECO was taken over by the German company Josef Kotte Landtechnik. With the founding of KAWECO B.V. and a transition phase, the production of slurry tanks began at the new location in Baak. This means that the focus is once again on slurry technology – supplemented by the continued supply of spare parts and service.

The KAWECO logo consists of the word "KAWECO" in a bold, black, sans-serif font. The letters are contained within a white rectangular box that has a black border. The box is slightly tilted to the right.

A DEDICATED AND EXPERIENCED TEAM IS SHAPING THE FUTURE OF THE KAWECO BRAND.

KAWECO STARTS 2025 WITH EXPERIENCE AND NEW ENERGY

Following the takeover, KAWECO will start the future in 2025 with a strong team. The new start will be supported by experienced former employees of Reesink Production, who will contribute their comprehensive expertise and passion for quality and innovation. Kaweco thus combines proven competence with fresh drive – for powerful technology that farmers and contractors can rely on.

With the move to the new location in Baak, KAWECO has successfully resumed production of slurry tankers. The experienced team contributes its extensive expertise to ensure the proven quality of the vehicles while developing innovative solutions for modern agriculture.

ADDED VALUE OF THE OPTI-JECT

The KAWECO OPTI-JECT, the strong substitute for the trailing shoe applicator. Partly due to a change in the slurry injection legislation, the OPTI-JECT is perfect for being able to continue running slurry at a small additional investment on your farm. The slurry is perfectly injected with a lightweight yet robust applicator. With the OPTI-JECT you leave beautiful work in the field!

LOW OWN WEIGHT

KAWECO OPTI-JECT combines a large working width with a low net weight. Due to the light but robust construction, it is possible to work with large working widths at low own weight. The OPTI-JECT starts from 1650 KG..

COMPLETE AS STANDARD

The OPTI-JECT is fully equipped as standard and ready for work. Including LED lamps and mechanical drop stop. The OPTI-JECT can be used immediately and is ready for work!

MINIMAL MAINTENANCE

The relatively simple construction of the OPTI-JECT ensures low maintenance. The frame and the elements are completely galvanized. The mechanical drop stop is also simple and maintenance-free. The bearings of the fertilizer discs are accessible and easy to lubricate. The KAWECO SV distributor ensures a good distribution of the slurry over a maximum of 40 spouts. The distributor has self-sharpening cutting blades, with a hardox steel distributor plate, and is hydraulically driven. The housing and the hydraulic motor are divided by a cord seal.

ENTRY MODEL WITH CONTRACTOR COMPONENTS

The OPTI-JECT injector is equipped with the best components. The applicator has a row distance of 20 cm, and ensures a good effect of the manure on the soil by means of soil following sprung elements. The Kaweco SV horizontal distributor, large 300 mm discs and spouts built from one piece ensure that the slurry is always applied in the right way. The OPTI-JECT guarantees the carefree application of many cubic meters of slurry. The injector is standardly equipped with 50 mm high quality hoses.

EQUIPED FOR DELIVERING RESULTS

VALUABLE OPTIONS

HYDRAULIC DROPSTOP

The KAWECO injectors can all be fitted with hydraulic cylinders to prevent leakage. The cylinders on the elements guarantee a sealed element to prevent leaks on the field or on the road.

SAFETY

To guarantee road safety, KAWECO has various options for shielding and marking, such as the mechanical disc shielding and marking boards.

EXPANDABLE IN WIDTH

The OPTI-JECT has a modular structure, which means that it is easy to place extra elements to increase the working width. This way you are ready for the growth of the future!

4-POINT HITCH ATTACHMENT

To make the OPTI-JECT suitable for each tank, it is possible to carry out the injector with a 4-point suspension, instead of the standard 3-point version.

	OPTI-JECT 6.40	OPTI-JECT 7.20	OPTI-JECT 8.00
WIDTH	6.40m	7.20m	8.00m
SPOUTS	32	36	40
DISTRIBUTOR	SV 40 HORIZONTAL	SV 40 HORIZONTAL	SV 40 HORIZONTAL
WEIGHT	1650kg	1775kg	1900kg

THE BEST OF A KAWECO IS BEHIND IT: BEAUTIFUL WORK
"THE KAWECO OPTI-JECT DELIVERS BEAUTIFUL WORK IN THE FIELD! WITH ITS LOW OWN WEIGHT, IT IS AN IDEAL APPLICATOR FOR THE WET PEAT SOILS IN FRIESLAND (THE NETHERLANDS)"
Bram de Kam, contractor in Aldeboarn (NL)
